

Making every day's life extraordinary

New Product

This design is especially made for Sushi, a plate that offers space for both your chopsticks and of course your Sushi. Enjoy and eat with taste!

On canvas

Most people know I like to do a lot of different things. Floral art, furniture, I design everything I see. Why? I have no explanation; I just feel what I should do. The step to painting is a little and logical move for me.

Hereby I like to show you my first canvas, I suspect many will follow.

The energy which I get from this is great and liberating.

Pim's vision

Another year older, always a moment that makes you think. What have I done so far? Have I achieved my goals? Are my dreams getting closer?

Keep your goals and dreams close but never forget what you are aiming for, the travel toward it, the friends you meet, the family you cherish and the moments that shape you.
