

Pim van den Akker - biography

Floral master, teacher, and designer Pim van Den Akker (28) has always been fascinated by nature. From the time that he was young, he spent most of his free time in nature. After seeing work from Daniel Ost; he knew what his mission in life would be.

Over the years, Pim has developed a lengthy resume some of which include: internationally published books; "Ik rouw om jou"(funeral design), "Floral composition" and "Ja, ik wil"(Bridal design), has been responsible for the design of many events like the "Home and Garden fair and Floral Movement. He has given demonstrations in Italy, the United States, Russia, France, England, Germany and so on, and works as a guest lecturer and member of national and international competitions.

Out of his love for design and his passion for integrating the traditional design with natural elements, Pim van den Akker founded a new design label, *Pimdesigned*. What Pimdesigned offers is a new approach to design by combining the best of both worlds. Floral and interior design. The company's philosophy is to bring inspiration to life surroundings. In the designs you will find untraditional combinations, items that bring warmth to interiors and elements that hold flowers and plants in completely new way.

The style of his floral designs remains unchanged. They are dynamic, refreshing and surprising and aimed at creating beauty. His passion on the field remains strong as ever, and his love to encourage, develop and grow people has resulted in Pimdesigned
